WAP Device Manager

Hello,

My name is Matt Loftus and I am an attorney working for Fish & Richardson, a law firm in the US that writes up patent applications for Intel. I have received your invention disclosure for the "WAP Device Manager — Management of Intel Network Equipment from a WAP supporting callular" and will be writing a US patent application. There are several preliminary matters that I need to resolve before beginning:

Which of you should be my primary contact for information concerning this invention? What is your preferred memor of communication? I am using email initially because I don't think I have useable phone numbers. The disclosure lists some American-looking numbers but I think these are internal intel numbers.

This should be sufficient to get started. If either of you have any questions, please call or small me. Thank you.

Best Regards,

Matthew B. Loftus Fish & Richardson P.C. 225 Frenklin Street Boston, MA 02110 617 521 7029 (volce) http://www.fr.com
